

Your clients can travel safely with us

Dear Valued Partner,

At Qatar Airways, we continue our commitment to getting your clients safely where they need to be.

Starting from 13 August 2020, we have a new medical requirement applicable for all our passengers travelling **FROM Bangladesh, Brazil, Iran, Iraq, Pakistan, Philippines, and Sri Lanka.**

When flying with us, your clients will be required to:

Provide a negative COVID-19 RT-PCR test result issued within 96 hours prior to their flight departure from one of the authorised laboratories. Children less than 12 years old who are travelling with family members are exempted from the test. To view the list of approved laboratories, please click [here](#).

Complete and submit a consent form at check-in along with the negative test result. For ease, you can ask your clients to download the form and complete it ahead of their travel. Please click [here](#) to download the form.

If passengers are unable to provide the negative test result and consent form at check-in, they will not be accepted for boarding the flight. These requirements apply to both existing and new bookings.

When they travel with us, your clients can expect the highest standards of hygiene and the latest security measures throughout their entire journey, whether on board or at our state-of-the-art hub, Hamad International Airport in Doha, Qatar.

Please click [here](#) for more information or contact your local Qatar Airways Sales Representative.

*** PCR test will also be required for passengers travelling with us from Armenia, India, Nepal, Nigeria and Russia, when we resume our services from these countries.**
