New Dubai arrival requirements *200421

Dear Trade Partner,

Please note that effective 22nd April 2021, passengers travelling from India to Dubai must hold a negative COVID-19 PCR certificate for a test conducted no more than **48 hours** prior to the time of departure.

Additionally, laboratory results will only be accepted from authorised labs that generate a **QR Code** linked to the original report.

The following existing test exemptions still apply:

- UAE nationals are exempt from taking a COVID-19 PCR test before departing to Dubai. They will be tested on arrival in Dubai.
- Children under the age of 12 and passengers who have a moderate or severe disability are exempt from taking a COVID-19 PCR test

.
Passengers arriving into DXB from certain countries (click here to check **list of countries**) will be required to take another PCR test on arrival at DXB.

Emirates flexible re-booking policy provides customers more opportunities to use their unused tickets or to book tickets for future plans. In addition Emirates continues to offer the **multi-risk travel insurance** to keep all our customers safe on their journeys and giving them extra security wherever they are in the world.

All information about where Emirates are flying now, and the the travel requirements for each country, are available on the **Emirates Partner Portal**.
Kindly disseminate this information to all concerned.

Kind Regards
Emirates - India
