

## Vaccinated Travel Lane from United Kingdom into Singapore

---

Dear Trade Partner,

We are pleased to share that quarantine-free travel between United Kingdom and Singapore will be available soon.

From 19-Oct-2021, eligible vaccinated travellers can now fly from United Kingdom into Singapore through the Vaccinated Travel Lanes (VTL) arrangement. This will allow eligible vaccinated travellers to fly between United Kingdom and Singapore for any purpose, including leisure travel, without serving quarantine. The designated VTL flight from London to Singapore is SQ317.

Please refer to the attached document to find out more about the VTL requirements and safety measures.

We look forward to welcoming you back on board Singapore Airlines very soon.

Best Regards,

Singapore Airlines - UK Trade Support
